

List of Hatch Project and Study Activities that Chemical and Process Engineering Graduates/Students could be employed in:

- Project Studies
 - Concept / Process Plant Design
 - Technology Evaluation & Selection
 - Pre Feasibility
 - Feasibility
 - Definitive
 - Detailed Planning
- Project Implementation
 - Detailed Design
 - Construction Management
 - Commissioning
 - Plant Rump-Up
 - On-going Operational Assistance
- Audits and Reviews (Consulting)
 - Due Diligence Studies
 - Process Support
 - Technical Engineering Services
 - Project Audits
- Electrowinning
- Reduction & Smelting
- Fluidization & Drying
- Refining
- Water Treatment

Commodities:

IRON ORE

COPPER

NICKEL

GOLD

ZINC

BAUXITE, ALUMINA, ALUMINIUM

URANIUM

DIAMONDS

COAL

MINERAL SANDS

Investigations for

- Beneficiation Plants
- Hydrometallurgical Extraction
